

Leased Capacity

CSquared's leased capacity gives you a dedicated fiber link that interconnects sites/locations. Our robust metro-Fiber network ensures maximum uptime, allowing for high service availability for optimum productivity. Our leased capacity provides you with a high capacity, protected connection.

Best fit for ISPs, MNOs and Enterprises looking for:

- An efficient ISP core network connection
- A high availability, reliable connection to base stations
- High capacity fiber circuits that seamlessly connect your branches to your headquarters

Features:

- 99.99% SLA
- Automated ordering process
- Simplified billing process
- Scalable Solutions
- Proactive service monitoring
- Secure reliable service
- Flexible bandwidth options
- 24/7 365 NOC services

Benefits:

1. Full redundancy

With sites deployed in a ring topology, our network has high availability and redundancy. This ensures maximum uptime leading to optimum productivity for your business.

2. Flexible Bandwidth Options

Our network offer scalable bandwidth options to suit your business needs

3. Extensive Coverage

Our 5000+KM footprint across Kenya, Uganda, Ghana, Liberia, DRC and Togo ensures that you are adequately covered and have access to a reliable and efficient network. Whether you're looking for Metro or intercity connectivity, CSquared has you covered.

4. Low Latency Solution

Our network infrastructure is built on an end to end fiber Infrastructure, optimized to ensure fast access and low latency for your mission critical applications

5. Excellent Service Support - 24/7 @ 365 NOC

Our team of experienced network engineers is well equipped and provides 24 hours monitoring and support to ensure you have a seamless experience with CSquared's network infrastructure and services

6. Dedicated Account Management

CSquared has technical specialists on the ground who are equipped to walk you through our products and advise on the best product fit for your business.
