

Fiber to the Home (FTTH)

CSquared's innovative wholesale FTTx solution provides fiber access to homes, apartment building and small offices to provide unprecedented high quality internet access

Best fit for SMEs and Enterprises looking for:

- An efficient, reliable and fast broadband connectivity
- Affordable pricing
- Scalable capacity depending on ones desired utilization

Features:

- WiFi enabled router/ ONU
- One Time installation
- Automated ordering process
- Simplified billing process
- Scalable solutions
- Proactive service monitoring
- Secure reliable FTTH solution

Benefits:

1. Affordable

FTTH is a relatively affordable product targeted for a residential/ household A low cost solution that enables the provisioning of Triple play services (Internet, Television and Telephone services) as well as the "New Normal", work from home (WFH) growing requirement..

2. Reliability

FTTH provides reliable and resilient services that are proactively monitored to provide optimum uptime.

3. Variety

CSquared's infrastructure is a shared metro fiber network, the key advantage here is the fact that once the infrastructure has been deployed one has the liberty to approach NOT one but any ISP/MNO of their preference to provide service to them, without having to do additional installation/ civil works.

4. Low Latency Solution

FTTH offers low latency solution built on an end to end fiber infrastructure
