

Port Fiber

CSquared's Port Fiber solution provides high quality broadband at a lower cost via shared infrastructure to any location across our metro fiber network.

Best fit for SMEs and Enterprises looking for:

- An efficient, reliable and fast broadband connectivity
- Affordable pricing
- Low capacity

Features:

- SLA of 95%
- Automated ordering process
- Simplified billing process
- Scalable solutions
- Proactive service monitoring
- Secure reliable FTTX solution

Benefits:

1. Affordable

Port Fiber uses a cost effective monthly pricing based on bandwidth. With Port Fiber, users enjoy flexible bandwidth options ranging from 2 Mbps to 25 Mbps

2. Reliability

Port fiber provides reliable and resilient services that are proactively monitored to provide optimum uptime.

3. Variety

Port fiber offers a variety of packages tailored to every business' needs and budget with an extensive coverage

4. Low Latency Solution

Port Fiber offers low latency solution built on an end to end fiber infrastructure
